DLP® Projectors with BrilliantColor™ Technology
offer Vibrant Color Reproduction,
Exceptional Compatibility and Reliability
for Corporate and Educational Applications**

DLP® Performance with BrilliantColor™ Technology and Six-Segment Color Wheel Provides Superior Color Reproduction with Exceptionally High Image Quality

Cutting Edge Technology Provides High-Quality Pictures

BrilliantColor Technology with Six-Segment Color Wheel

BrilliantColor Technology improves picture brilliance particularly for intermediate colors, providing natural, detailed images. Sharp has also developed a 3x Speed Color Wheel with six color segments including yellow and cyan added to red, green, blue and white. With Sharp's unique color matching technology and these six color combinations, images are reproduced with extreme high accuracy.

4-segment color wheel (red, blue, green, white)

6-segment color wheel (red, blue, green, yellow, cyan, white)

2200:1 High-Contrast, High-Quality Image

By utilizing the DLP optical system and Sharp's optical technology, these projectors produce crisp details and sharper blacks in black parts thanks to a 2200:1 high contrast ratio.

PG-F312X

Models in the same class as these frequently provide a contrast ratio of 400:1

DVI-I Terminal with DLP System for Full Digital Projection

Full digital projection with the DVI input terminal and DLP system enables virtually noise-free images from digital sources. The terminal also complies with High-bandwidth Digital Content Protection (HDCP) to support digital video content in high-definition. This DVI-I terminal additionally may be used as a second analog RGB input when coupled with an appropriate adapter or interface.

DLP Digital Image

Using a DLP chip, the image is composed of more than a half million micromirrors which are separated from each other by a distance of merely one micron. This provides a seamless, finely detailed picture. High-speed on/off switching helps deliver smooth, full-motion video.

High-Resolution Seamless Image Comparison

3x Speed Color Wheel

The projectors employ a color wheel with an engine speed of up to 3x, improving color break-up to an invisible level. Also, the non-contact Fluid Dynamic Bearings for the high-speed rotating color wheel axle have an extremely long lifespan.

IP Conversion Image Processing

Image Processing provides optimal video performance. The motion-adaptive scan images produce smooth moving scenes and ensure smooth natural lines and edges for 480i and 1080i display.

Without TrueVision™ Image Processing

With TrueVision™ Image Processing

Outstanding Performance and High-Quality Reliability

High Brightness: 3000 ANSI lumens (PG-F317X and PG-F312X), 2600 ANSI lumens (PG-F262X), 2400 ANSI lumens (PG-F212X-L)

Sharp's advanced optoelectronics technology maximizes light output, providing crystal clear images in amazingly high brightness.

Low Fan Noise

The DLP high-speed color wheel with non-contact Fluid Dynamic Bearings, together with multiple ultra-quiet cooling fans, reduce unpleasant noise, enabling quiet operation at 29dB in Quiet Mode. The operation is so quiet it typically causes no disturbance, even in meetings or school classes.

Sealed DLP Chip with Filter-Free Design

The sealed DLP chip needs no filter and less maintenance, resulting in a lower cost of ownership and longer lifespan.

Long-Life High-Performance DLP Picture

With DLP technology, the projectors maintain a uniform color reproduction capability for an exceptionally long period of time. DLP chip formation, in coordination with finely structured mirrors, additionally provides stable performance and delivers high-quality pictures for extended periods.

In addition, because there is no burn-in or remaining afterimage, the projectors are ideal for still picture projection such as for guidance board applications and projecting CAD images.

DLP projection

By RIT/Munsell Color Science Laboratory Test

After 4,100 hours (The picture shows no significant deterioration even after using the DLP chip 4,100 hours.)

Intuitive Design and Functions to Support Presentation Convenience

Front Exhaust Engine

The new projector series has an exhaust engine on the front so that the viewers can remain focused on the screen without distractions of noise and air.

Direct Power Off Switching

Direct Power Off lets users immediately unplug and move the projector. In addition, this feature helps control the power for multiple projectors simultaneously by using the room's primary power switch in conjunction with the auto restart function.

Quick Start

It only takes approximately 3 seconds at start up to project an image.

Setup Guide for Interactive Operation

The Setup Guide provides intuitive OSD images to show the next step interactively, including focus, zoom and height adjustment.

Setup Guides

Setup guide is displayed after the projector is turned on.

Multiple Connections for a Wide Range of Applications

Multiple Input Terminals

Projectors can be connected to DVD players, cable and satellite boxes, laptop and desktop computers, HDTV tuners, VCRs and video game consoles. DVI-I and D-sub terminals (in/out) are also provided.

Note: PG-F317X also includes RJ-45 LAN terminal (not shown in above image).

Other Outstanding Features

- **Condenser Lens Optics** Crisp detail, sharper black and ghost-less image.
- **4:3 and 16:9 Aspect Ratios and HDTV/DTV and DVD Compatible** (1080p, 1080i, 720p, 576p, 576i, 540p, 480p and 480i).
- **Image Shift Function** Images projected in 16 x 9 format can be vertically shifted for better viewing in limited spaces.
- **Theft Deterrent Function "System Lock."**
- **Key Lock Function.**
- **Closed Caption** with black and white text for easy readability.
- **RJ-45 Network Connector (PG-F317X only)** for remote access by web browser, diagnosis and auto e-mail sending, and ability to link to a specific website for service and support.

Interactive Help Menu

The Help Menu displays commonly occurring problems and assists the user in solving problems with operation.

Presentation Assist Remote Control

A variety of functions may be performed with the projector remote control to aid your presentation, including mouse control and page up and down. The following functions have been added for further presentation support.

Pointers: Five pointer icon shapes can be used to impressively draw attention to your subject.

Spotlights: Three spotlight sizes, ranging from 1/25 to 1/9 or 1/8 the screen, provide visual effects to focus on the specified subject.
